

# Design Process

What can you expect during a renovation or design project?

**Initial Consultation** – The initial consultation lays the groundwork for the whole project. We'll discuss

what you want to achieve, the scope of the project, your budget, and our fee options.

**Conceptual Design** – To create the foundation of the project, Magpie Interiors will create a mood board with conceptual photos of the overall design.

**Design Development** – Magpie Interiors will develop a complete design scope of work including drawings and Selections.

**Selections** – Magpie Interiors will send you details on specific selections and/or we can go shopping together for final selections.

**Implementation** – An additional benefit of working with Magpie Interiors is that we're insiders: we know who manufactures quality and which contractors provide superior work at reasonable prices, and where to get unusual or hard-to-find items.

**Installation** – Magpie Interiors is personally invested in the success of your project. I'll be on hand every step of the way to help you review the work of your delivery team if you require additional support.

Quality Review – Details are important. Before I consider your project complete, I will review the “task list” we develop for each installation. This is an inventory of everything we planned to do (or change) in order to meet our initial design goals.

Project Closeout – Once the work within that task list is complete, we’ll have one final consultation to make sure you’re happy with everything we’ve done, and confirm that we’ve met or exceeded your initial expectations.

"The best is yet to come."

**Now you get to enjoy life in your new space!**
